Project Title	BITCOIN PRICE PREDICTION

Description of the project:

Bitcoin is a cryptocurrency which is used worldwide for digital payment or simply for investment purposes. The objective of Bitcoin Prediction is to predict the Bitcoin price accurately using different machine learning algorithms taking into consideration various parameters that affect the Bitcoin value.

For the first phase of investigation, it is aimed to understand and identify daily trends in the Bitcoin market while gaining insight into optimal features surrounding Bitcoin price. The data set consists of various features relating to the Bitcoin price and payment network over the course of time, recorded daily. For the second phase of investigation, using the available information, we will predict the sign of the daily price change with highest possible accuracy

Front end and Backend Tools	Front end: HTML, CSS Back end: Python
